

PATH FORWARD

To Business Transformation

Agile Leadership Workshop

Workshop Overview

Agile is a proven method for responding to business challenges and aligning actions to client requirements. Over the years, Agile has evolved from a software development environment to a collaborative approach that can be successfully applied to any business.

Some of the questions your team may be asking:
What is Agile? Is Agile right for my organization?
What is my role as a leader implementing Agile?
How does my organization get started?

The Agile for Leaders Workshop brings together a leadership team in a safe environment to explore the Agile way of working. Through activity-based learning, leaders experience the behaviors and outcomes of applying Agile practices.

If you are considering Agile for your organization, this workshop is a must for your leadership team.

Value / Return on Investment

- Create an environment of continuous improvement and feedback in your organization
- Accelerate the delivery of business value
- Lower the risk of implementing change
- *Sustained* business improvements
- Improved client satisfaction
- Improved adoption of Agile in your organization

Workshop Objectives

- Determine whether the Agile way of working is right for you and your organization
- Create an awareness of the key organizational behaviors needed to embrace Agile
- Develop new adaptive leadership skills
- Create a road map for adopting Agile in your organization

Audience

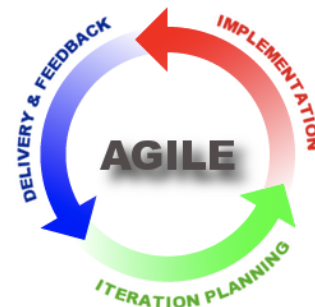

This workshop is intended for leaders of an organization who are ultimately responsible for the management and success of their business.

Method / Approach

Representatives are guided through an interactive, facilitated approach to experience the Agile method and practices.

Duration

The preferred delivery approach is two consecutive days. Based on client requirements, this approach can be customized.
