To Business Transformation

Lean Fundamentals Towards Bronze Certification

Course Overview

Lean is a management philosophy based on the Toyota Production System (TPS), where the objective is to identify and eliminate everything that does not add value (waste) in the eyes of the customer through continuous improvement that improves both the operational efficiency and financial performance of a business.

In this course, you will learn how to focus on improving process performance with a clear view of the end state, by using a wide range of Lean techniques and tools, while applying the 8-Step Structured Problem-Solving process to solve a customer problem.

Course Objectives

- Understand and apply the 8-Step Methodology as a framework.
- Recognize how lean directly addresses the elimination/reduction of operating costs, cycle time and non value-added activities.
- Identify and verify causes of process inefficiencies and lean wastes.
- Select and implement appropriate solutions for process improvement.
- Standardize work and sustain gains.

Audience

This five-day instructor-led, hands-on course is for anyone looking to understand and apply lean principles along with the 8-Step Structured Problem-Solving methodology.

Method / Approach

This course is an expert-led classroom course, with extensive hands-on activities through the use of a business case study to enhance the learning experience and enable students the ability to apply the Lean methodology.

Duration

The preferred delivery for this course is five consecutive days of classroom.
