

PATH FORWARD

To Business Transformation

Creating a School Culture of Excellence

Course Overview

History has proven that successful school districts create a constructive organizational culture, which directly impacts their school's performance.

What are the challenges at your school district?
Labor relations, test scores, budget, impact of cyber schools, student engagement, safety, bullying, dropouts, school spirit?

This experiential workshop un-layers your current organizational culture. You become aware of the positive and negative behaviors that sustain or inhibit your school district's performance.

Using a variety of research-based cultural assessment tools and collaborative techniques, your faculty, administration and school board members experience a proven approach that will influence sustainable change in your school district.

The focus of this workshop is the renewal of a school's historical mission of educating individuals to be productive and effective citizens.

Let our team of experienced change facilitators get you started on the path to cultural excellence.

Value

- Increased engagement of faculty, administration and school board members
- Increased awareness of the behaviors that influence your school district's performance

Workshop Objectives

- Baseline your school's *Current Culture* and *Preferred Culture*
- Identify key organizational behaviors that directly impact – both positively and negatively – school performance
- Define your school district's core values
- Define your strategic intent moving forward

Audience

This workshop audience is customizable, which can include members of the administration, school board and faculty.

Method / Approach

Through facilitated activities, group exercises and discussions, participants discover and apply their new learning.
